ABOUT ME

Economics graduate from UPF with an Advanced Quantitative Methods certificate in econometrics, statistics and forecasting. Four years of experience in finance departments across industrial and distribution companies, building business reporting with SAP, Power Query and Power BI, including budgeting, variance analysis, sales and purchasing. Six months focused full-time on SQL, Python and data modelling, with projects published on GitHub. Now looking to move into a Junior Data Analyst or Business Analyst role, bringing strong business context and hands-on analytical skills.

EXPERIENCE

Reporting Analyst | BlueSun · Industry sector · nov. 2025 – mar. 2026

- Financial and sales reporting for management: Net Sales, EBITDA, P&L, daily sales performance and business variance analysis.
- ETL processes in Power Query using SAP extracts, including data cleaning, transformation and Power BI dashboard modelling.

Controlling and Accounting technician | Laboratorios Hartmann · Industry sector · ene. 2024 – sept. 2025

- Budgeting and variance analysis by cost centre, including month-end closing, cash flow monitoring and business KPI tracking.
- Automated recurring reports through Power Query ETL from SAP into Power BI, including data validation and reporting accuracy checks.
- Worked with business teams to gather reporting needs and translate them into clear, actionable reports.

Accounts Payable Specialist (purchase-to-pay) | TD Synnex · Technology Distribution Sector · sept. 2021 – ene. 2024

- Controlled and validated purchase-to-pay data in a high-volume transactional environment using SAP and Excel / Power Query.
- Worked directly with suppliers and internal teams, identifying process inefficiencies and supporting improvements across the purchase-to-pay cycle.

DATA PROJECTS · GITHUB.COM/NELSONRIVERA28

Olist Customer Analysis · Python (pandas), Jupyter

- End-to-end customer analytics on Olist e-commerce data, combining cohort analysis, segmentation and logistic regression to identify drivers of repeat purchase and low reviews.

Chinook Database Analysis · SQL

- Analysed sales performance, customer behaviour, product trends and revenue evolution using SQL joins, CTEs and window functions, with results visualised in Tableau.

EDUCATION

Bachelor's Degree in Economics | Universitat Pompeu Fabra · 2017 – 2021

- **Advanced Quantitative Methods (MQA) Certificate** — selective UPF track covering econometrics, statistics, forecasting, data analysis and modelling, with practical work in R, Stata and Python.

Full-time self-directed Data Analytics training | Barcelona · mar. – sept. 2026

- Focused on SQL, Python (pandas), data modelling and visualisation, applying these skills through hands-on projects published on GitHub.
